Hello St. HOPE Families,

This message is to update you on the safety measures that St. HOPE Public Schools have been taking in order to ensure your scholars are safe at school during this time of poor air quality. We have been keeping all of our scholars indoors throughout the entire day including recess, lunch, and athletics. In addition, we are minimizing the opening and closing of our school doors. Last night, Sac City, conducted a check of Air Quality Conditions at all of their sites, including ours, and consulted with the leadership at the Sacramento Air Quality Management District. At the recommendation of the Sacramento Air Quality Management District, our schools will remain open and our focus will be to keep our scholars indoors. We understand that many of our families count on us to provide a safe and supervised learning environment and take this responsibility very seriously. We will continue to assess and monitor the air quality conditions and update you if there are any changes. We are looking forward to a great last two days of student learning before Thanksgiving Break!

Thank you,

Kari Wehrly
